Coronial Project

In February 2016 the R.A. Rodda Museum of Pathology at the University of Tasmania advised the Coroner's Office that the Museum may have in its collection some individual specimens possibly retained following coronial autopsies carried out in the past. The existence of these specimens has since been confirmed and formally reported under the provisions of the *Coroners Act 1995* and the following matters have been referred to the Magistrates Court - Coronial Division for investigation.
